DETAILED ACTION

1. Acknowledgment is made in the receipt of the amendment filed August 23, 2007.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 8-12, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,671,576 to Fourie.

Re-claims 1, 2, 9, 10 and 16, Fourie discloses a method for electrodynamically braking a rail vehicle which is equipped with a drive, comprising regulating the acceleration (such as RA) of the rail vehicle as a function of its velocity (see column 6 lines 4-9), the acceleration (such as R'M) is regulated to a set point acceleration which is proportional to the velocity. The acceleration (or retardation signal/deceleration) is modulated in a closed loop control process, see column 8 lines 32-68 to column 9 lines 1-39. The acceleration is determined as a first derivative of the velocity (as determined by differentiator 52, see column 6 lines 4-9).

Re-claims 3-5, 11 and 12, the torque, or braking is controlled accordingly by the controller, and is controlled to within limits to reduce wheel slippage.

Re-claims 8 and 15, the velocity is determined from rotational speeds of the axle.

Art Unit: 3683

Allowable Subject Matter

4. Claims 6, 7, 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments, see page 7, filed August 23, 2007, with respect to the rejection(s) of claim(s) 1-5 and 8 under 35 USC § 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Fourie.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Anwar teaches a closed loop control process.
